FCBAi
Advanced-Applied-Impactful

Overall Structure

- **AERIS → The umbrella initiative**
- **CAELIS → The research, leadership, and innovation center**
- **HORIZON → The venture studio building startups**

Think of the navigation logic like this:

```
AERIS (Umbrella Initiative)
│
├── CAELIS (Center / Research / Leadership / AI)
│
└── HORIZON (Venture Studio / Startup Creation)
```

The **AERIS page should inspire and frame the ecosystem**, while the other two pages **go deeper into execution**.

Page — **AERIS**

Berkeley's Initiative for Aerospace Innovation and Entrepreneurship

1. Hero Section (Top of Page)

Purpose: immediately explain what AERIS is.

Title

AERIS
The UC Berkeley Initiative for Aerospace Innovation and Entrepreneurship

Tagline

Where aerospace, AI, and entrepreneurship converge.

Short description

AERIS connects UC Berkeley's research excellence, Silicon Valley's innovation ecosystem, and global aerospace leaders to accelerate the next generation of aerospace technologies and ventures.

CTA Buttons

- Explore the Ecosystem
- Join the Community
- Upcoming Events

2. Why Aerospace, Why Now

Purpose: create urgency and relevance.

The Aerospace Renaissance

Aerospace is entering a new era defined by:

- Autonomous systems and AI-enabled aviation
- Space commercialization and new orbital economies
- Climate-driven innovation in sustainable flight
- Security and dual-use technologies redefining security

Berkeley's Role

UC Berkeley sits at the intersection of:

- **Advanced research**
- **Entrepreneurship**
- **Artificial intelligence**
- **Silicon Valley innovation**

AERIS channels this unique environment to build the future of aerospace.

3. A Unique Partnership Ecosystem

Purpose: show credibility.

NASA, Silicon Valley, and Berkeley

AERIS leverages Berkeley's proximity to:

- NASA Ames Research Center
- Leading aerospace startups
- Venture capital
- Frontier AI companies

This environment enables rapid collaboration between **researchers, founders, investors, and industry leaders.**

Possible visual:

```
Berkeley
   │
   ├── NASA Ames
   ├── Silicon Valley Startups
   ├── Venture Capital
   └── Global Aerospace Industry
```

4. The Three Pillars of AERIS

Purpose: introduce CAELIS and Horizon.

1. CAELIS

Catalyst for Aero+Space Entrepreneurship, Leadership, Innovation and AI Solutions

CAELIS drives research, leadership development, and open innovation programs connecting academia and industry.

2. Horizon Venture Studio

Horizon incubates and accelerates aerospace ventures emerging from Berkeley and the broader ecosystem.

3. Industry Partnerships

AERIS works with aerospace companies, defense organizations, and technology leaders to accelerate innovation through:

- collaborative research
- startup partnerships
- executive education
- open innovation challenges

5. Events & Community

Sky's Not the Limit — Aerospace Innovation Series

AERIS hosts an annual gathering bringing together:

- aerospace founders
- investors
- engineers
- policymakers
- researchers

The event explores the future of aerospace, space technology, AI-enabled flight, and the next generation of aerospace entrepreneurship.

CTA:

- Learn about the event
- Register
- Partner with us

6. Join the Ecosystem

Engage with AERIS

Ways to participate:

Industry

- research partnerships
- open innovation programs
- corporate engagement

Entrepreneurs

- venture studio
- startup mentorship
- investment connections

Students & Researchers

- fellowships
- innovation programs
- aerospace entrepreneurship

CTA Buttons:

- Partner With Us
- Explore CAELIS
- Discover Horizon

7. Footer

- About Berkeley
- Institute for Business Innovation
- Fisher Center for Business and AI
- Contact
- Social links

CAELIS Page Structure

Catalyst for Aero+Space Entrepreneurship, Leadership, Innovation and AI Solutions

1. Hero Section

Title

CAELIS
Catalyst for Aero+Space Entrepreneurship, Leadership, Innovation and AI Solutions

Tagline

Advancing aerospace innovation through AI, entrepreneurship, and global collaboration.

Short Description

CAELIS connects researchers, entrepreneurs, aerospace leaders, and investors to accelerate the development of next-generation aerospace technologies and ventures.

Operating at the intersection of **AI, aerospace engineering, entrepreneurship, and global industry partnerships**, CAELIS builds the innovation pathways required for the future of flight and space.

CTA Buttons

- Partner With CAELIS
- Explore Programs
- Upcoming Events

2. Our Mission

Purpose: clearly explain the center's role.

Building the Aerospace Innovation Ecosystem

CAELIS exists to catalyze innovation in the aerospace sector by connecting:

- **research institutions**
- **industry leaders**
- **entrepreneurs**
- **investors**
- **public agencies**

Our mission is to accelerate the development and deployment of transformative aerospace technologies through **AI-driven innovation, entrepreneurship, and leadership development.**

3. Focus Areas

This section explains **what CAELIS actually works on**.

AI for Aerospace

Advancing the use of artificial intelligence across aerospace applications including:

- autonomous flight systems
- predictive maintenance
- satellite data analytics
- air traffic optimization
- aerospace manufacturing

Entrepreneurship & Venture Creation

Supporting the creation and scaling of aerospace startups through:

- startup mentorship
- investor engagement
- venture studio collaboration with **Horizon**

Open Innovation with Industry

Creating collaborative programs between aerospace companies and the Berkeley ecosystem to accelerate innovation through:

- joint research
- innovation challenges
- startup partnerships
- executive engagement

Leadership for the Aerospace Era

Developing responsible and visionary leaders capable of navigating the technological and geopolitical challenges shaping aerospace.

Programs include:

- executive education
- innovation leadership programs
- policy and strategy dialogues

4. Programs & Initiatives

This section makes the center **feel active and real**.

Examples:

Research Initiatives

Collaborative research programs focused on:

- AI-driven aerospace systems
- space economy innovation
- sustainable aviation technologies
- digital infrastructure for aerospace

Innovation Programs

Programs connecting startups, researchers, and industry partners.

Examples:

- aerospace innovation fellowships
- startup acceleration initiatives
- open innovation labs

Student Engagement

Providing Berkeley students with opportunities to participate in aerospace innovation through:

- research projects
- entrepreneurship programs
- venture collaborations

5. Leadership & Team

Purpose: credibility.

Leadership

Director
Faculty leadership

Advisory Board

Industry leaders from:

- aerospace companies
- venture capital
- research institutions

Affiliated Faculty & Researchers

Faculty and research groups connected to the center.

6. Research Partnerships & Sponsorship

Purpose: attract industry.

Partner with CAELIS

Industry partners collaborate with CAELIS to:

- access cutting-edge research
- connect with emerging startups
- explore AI-driven aerospace innovation
- engage with Berkeley's talent ecosystem

Partnership models

- research sponsorship
- innovation partnerships
- corporate memberships
- joint programs

7. Events

Sky's Not the Limit — Aerospace Innovation Series

CAELIS contributes to the **Sky's Not the Limit** event series bringing together:

- aerospace startups
- researchers
- investors
- industry leaders
- policymakers

Topics include:

- AI in aerospace
- commercial space
- next-generation air mobility
- aerospace entrepreneurship

CTA

- View Events
- Register
- Sponsor

8. Connect With CAELIS

Contact information

- General inquiries
- Industry partnerships
- Research collaboration

Location

UC Berkeley
Institute for Business Innovation
Fisher Center for Business and AI

- Contact Us
- Become a Partner

HORIZON Page Structure

The Venture Studio for Aerospace Innovation

1. Hero Section

Title

HORIZON
The Venture Studio for Aerospace Innovation

Tagline

Building the next generation of aerospace ventures.

Short description

Horizon is the venture studio of the AERIS ecosystem at UC Berkeley.
We work with founders, researchers, and industry partners to transform breakthrough aerospace ideas into scalable companies.

Operating at the intersection of **AI, aerospace engineering, and entrepreneurship**, Horizon helps launch ventures shaping the future of flight, space, and autonomous systems.

CTA

- Apply as a Founder
- Partner With Us
- Explore Ventures

2. Why Horizon

The Aerospace Startup Opportunity

A new wave of aerospace innovation is emerging:

- autonomous aerial systems
- next-generation satellite infrastructure
- AI-driven aviation
- climate technologies for aviation
- advanced propulsion
- defense and dual-use technologies

However, aerospace ventures face unique challenges:

- deep technical complexity
- long development cycles
- regulatory barriers
- high capital requirements

Horizon exists to help founders **navigate and overcome these challenges.**

3. What We Do

Venture Creation

Horizon helps build aerospace startups from early concepts to venture-scale companies.

We work with:

- founders
- researchers
- engineers
- industry experts

to identify opportunities and build new ventures.

Startup Acceleration

Horizon supports startups through:

- venture design
- technical mentorship
- go-to-market strategy
- investor introductions
- pilot partnerships with industry

Venture Partnerships

We collaborate with:

- aerospace corporations
- venture capital firms
- government agencies
- research institutions

to accelerate commercialization of breakthrough technologies.

4. Venture Themes

This section helps investors understand the focus areas.

AI for Aerospace

AI-enabled systems for flight, space, and aerospace operations.

Autonomous Systems

Uncrewed aerial systems, autonomous navigation, and robotic aerospace platforms.

Space Infrastructure

Technologies supporting the emerging space economy including satellites, data platforms, and orbital services.

Sustainable Aviation

Technologies enabling lower-emission aviation and new energy systems.

Defense & Dual-Use Technologies

Solutions with both commercial and defense applications.

5. How the Studio Works

Step 1 — Opportunity Discovery

Identify high-impact opportunities emerging from research, industry needs, and technological breakthroughs.

Step 2 — Venture Formation

Build founding teams and develop initial product and business models.

Step 3 — Acceleration

Support early-stage ventures through mentorship, partnerships, and investment connections.

Step 4 — Scale

Help companies raise capital and scale operations through the global aerospace ecosystem.

6. Current & Emerging Ventures

This section showcases credibility.

Examples:

- early-stage ventures from the studio
- alumni startups
- spinouts

This section can also include:

- logos
- short venture descriptions

7. Work With Horizon

Founders

We work with entrepreneurs building the next generation of aerospace technologies.

Apply to join the venture studio.

Researchers

Researchers with breakthrough technologies can work with Horizon to translate research into startups.

Industry

Aerospace companies partner with Horizon to:

- identify new technologies
- collaborate with startups
- explore venture opportunities

Investors

Horizon works with venture capital firms and strategic investors interested in aerospace innovation.

8. Events & Community

Horizon participates in the **Sky's Not the Limit** aerospace innovation series.

Events connect:

- founders
- investors
- engineers
- aerospace leaders

9. Join Horizon

CTA

- Apply as Founder
- Partner with Horizon
- Contact Us
