Startup Profiles

Agro Accelerator Cohort 2026

FCBA Advanced-Applied-Impactful

Startup List

Startup	Website	Activity Category	Notes
HEFT	https://heft.systems/	Livestock / Dairy Tech	AI herd health and fertility monitoring
Raymetra	https://raymetra.pro/	Ag Storage / Inventory Monitoring	LiDAR and 3D monitoring for silos and warehouses
YHarvest	https://yharvest.io	Precision Agriculture / Field Intelligence	AI solutions for precision agriculture
artAXE	http://artaxe-studio.com/	Ag-Adjacent Enabling Tech	IoT, firmware, hardware, and prototyping
Feodal	https://feodal.online/	Farm Operations / Land Management	Platform for farmers, landowners, communities, demining
HowCow	https://howcow.tech	Livestock / Dairy Tech	Likely cattle/dairy related; verify if needed
Innoneers	https://innoneers.com	Ag-Adjacent Enabling Tech	Engineering and intelligent software development
Agronix	https://agronix.ua/	Ag Drones / Ag Equipment	DJI Agriculture drones, training, equipment services
VALVIX.AI	https://valvix.ai	Greenhouse / Controlled Environment Ag	Smart greenhouse automation
PROFEED Mix	https://profeed.systems/mix/	Livestock / Dairy Tech	Dairy farm software and feed management
SAFIS.AI	https://www.linkedin.com/company/safis-ai	Precision Agriculture / Field Intelligence	Soil and crop monitoring with IoT and AI
Agrico Ukraine	https://www.agrico.com.ua	Seeds / Crop Genetics / Crop Production	Seed and table potatoes
b2beings	https://b2beings.com	Ag-Adjacent Enabling Tech	B2B SaaS product development
GIS-Point	https://gis-point.com	Agri GIS / Geospatial	GIS, IoT, and AI for agriculture
Almexoft	https://almexoft.com.ua/	Ag-Adjacent Enabling Tech	Document management and workflow software
Sirocco Energy	https://www.siroccoenergy.com	Climate / Clean Energy	Wind energy solutions

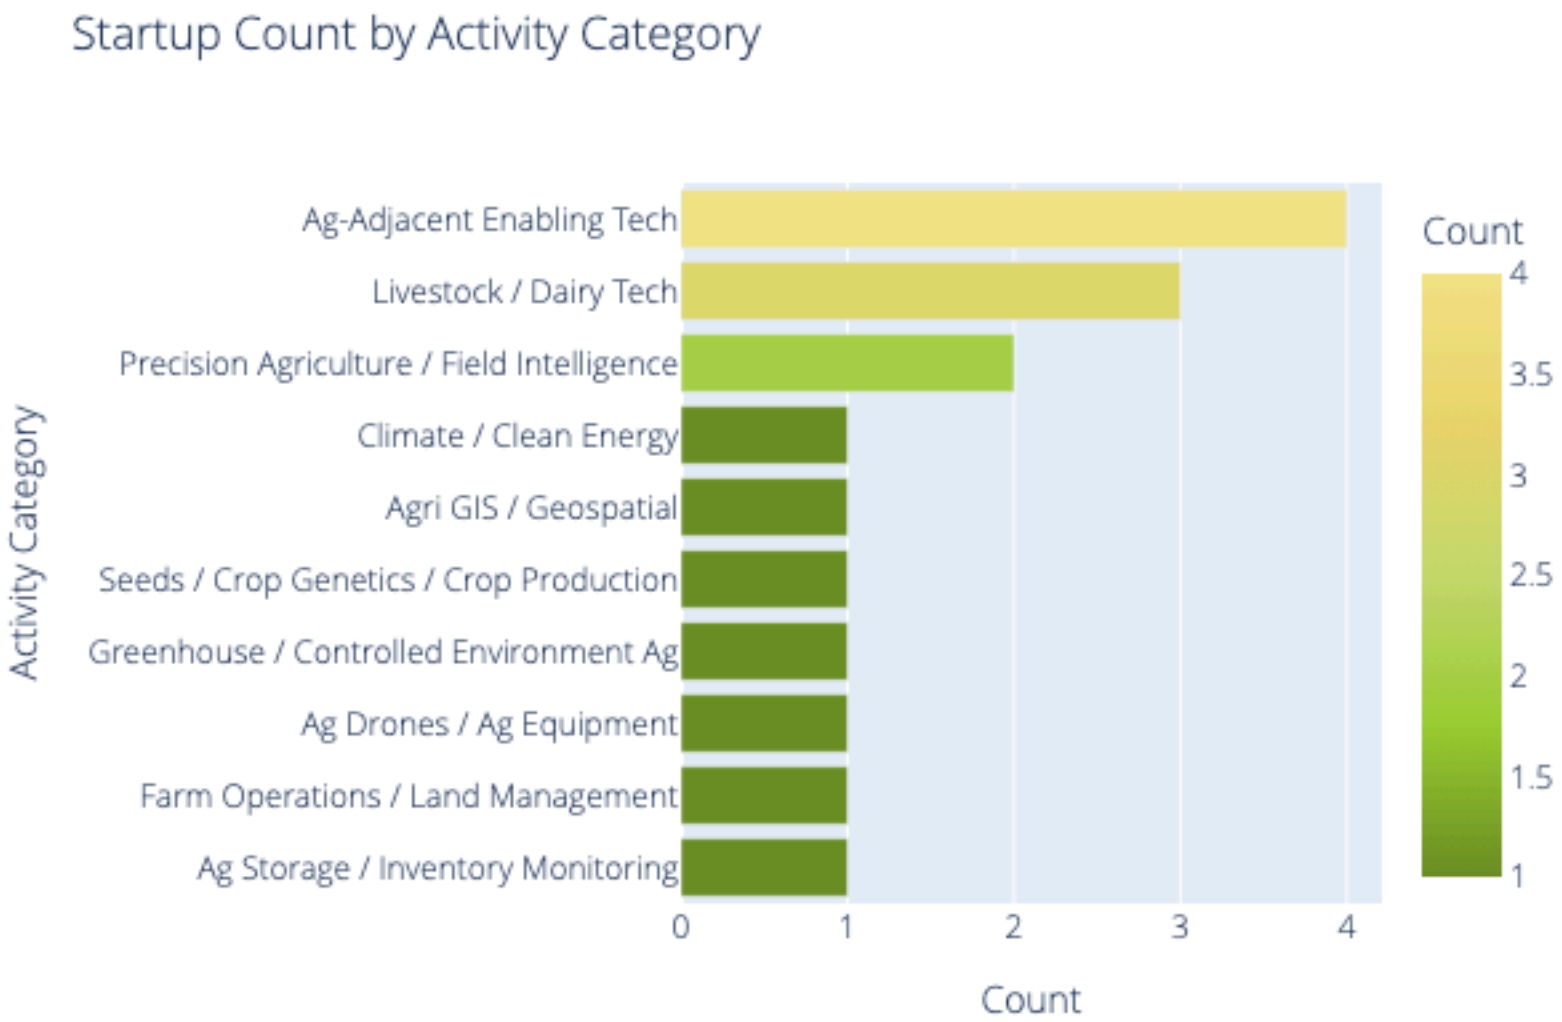
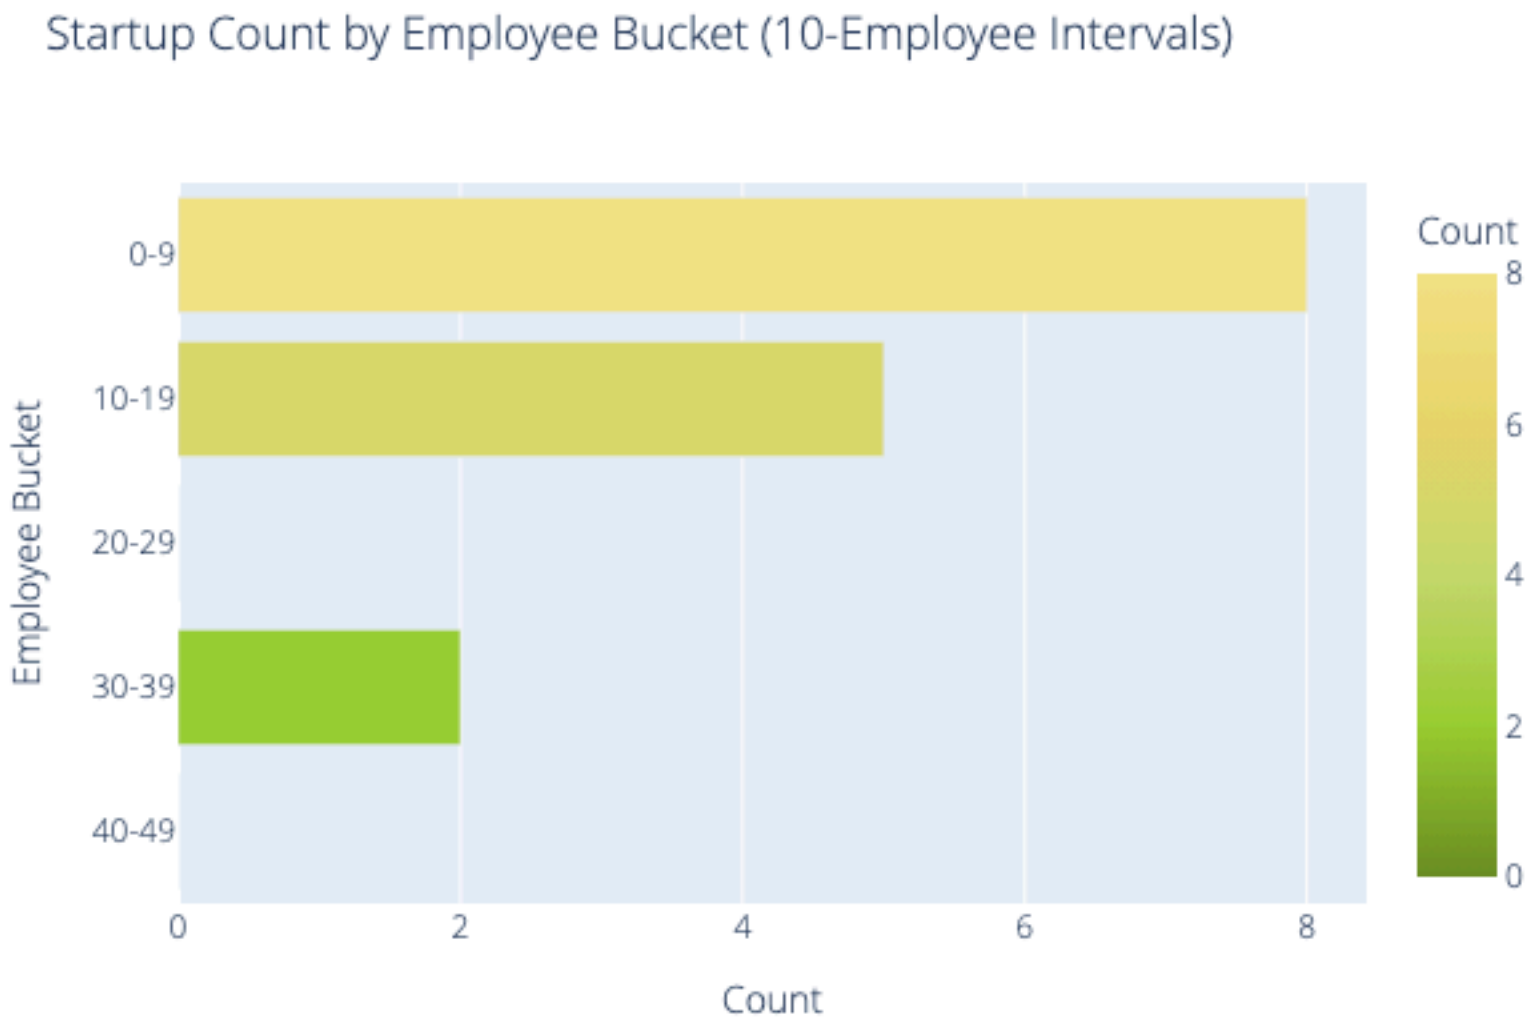
Cohort Categories



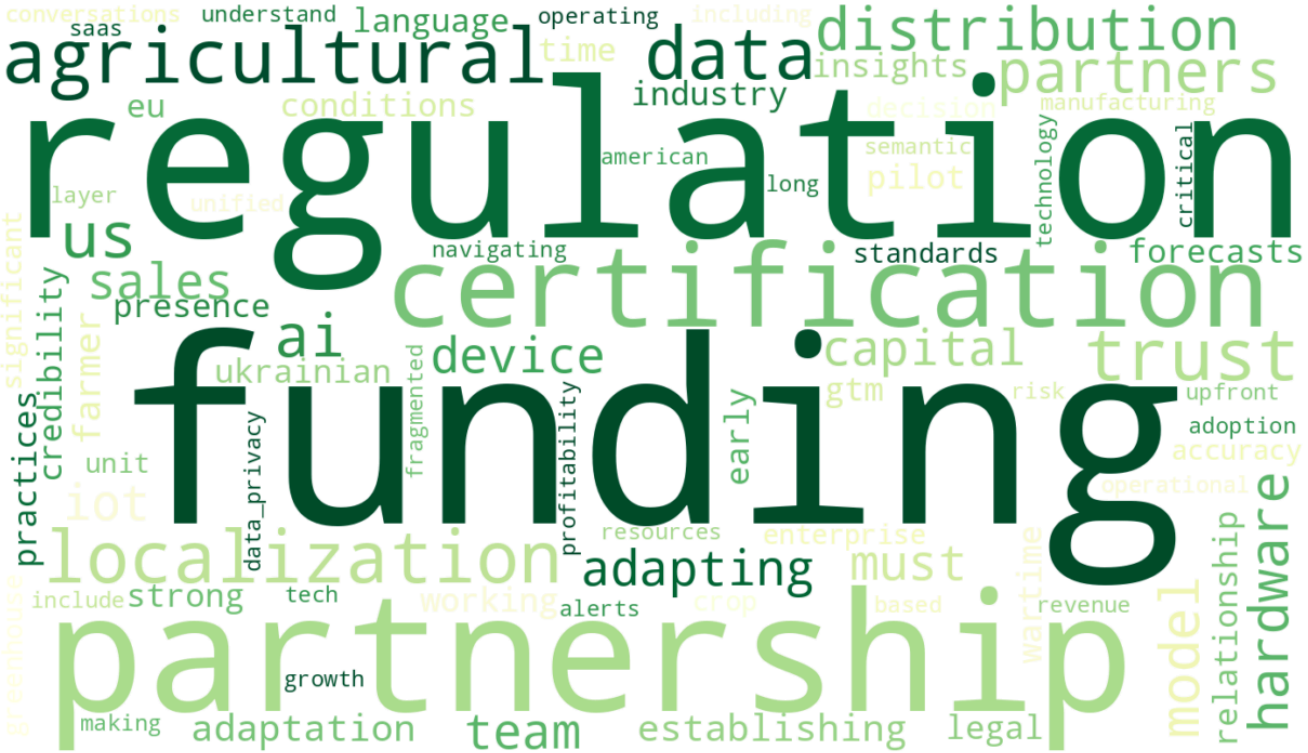
Cohort Categories



Challenges

The cohort is not mainly blocked by product ideas, but by the friction of cross-border scaling. The strongest recurring barriers are partnerships, financing, regulatory/certification hurdles, localization, trust-building, and the operational complexity of entering new markets.

Word Cloud of International Scaling Challenges



Expectations

Across the cohort, the main ask is clear: startups do not want a generic exposure trip. They want a **market-entry acceleration program** that helps them turn interest into pilots, partnerships, and investor traction. The repeated outcomes are U.S. market validation, pilot launches, channel or distribution partnerships, investor introductions, GTM refinement, and help with regulatory or operational readiness.

Word Cloud of Expected Program Outcomes

The Main Asks

1. Market validation

Structured access to U.S. growers, greenhouse operators, agri-holdings, distributors, and advisors to test fit, refine messaging, and validate demand.

2. Pilots and first traction

Support to secure pilot projects, demo sites, and first commercial footholds — especially with dairy farms, greenhouse operators, and early U.S. users.

3. Partnerships

Warm introductions to distributors, dealers, integrators, machinery players, banks, insurers, and technology partners to accelerate market access.

4. Investor access

Qualified investor introductions, stronger pitch materials, and better fundraising readiness for pre-seed and seed rounds.

5. GTM and export roadmap

Guidance on ICP, pricing, channel strategy, support model, export planning, and international sales execution.

6. Regulatory readiness

Practical help on certification, compliance, FCC-type requirements, and other U.S. market-entry constraints.

7. Product adaptation

Mentorship to adapt AI models, product design, and architecture to U.S. crops, climate, infrastructure, and buyer expectations.

8. Credibility and follow-up

A trusted Berkeley bridge into the ecosystem, plus continued mentorship beyond the immersion to convert momentum into results.
